

# Social Determinants of Health in South Carolina

Joshua Sellner, PhD, MSPH

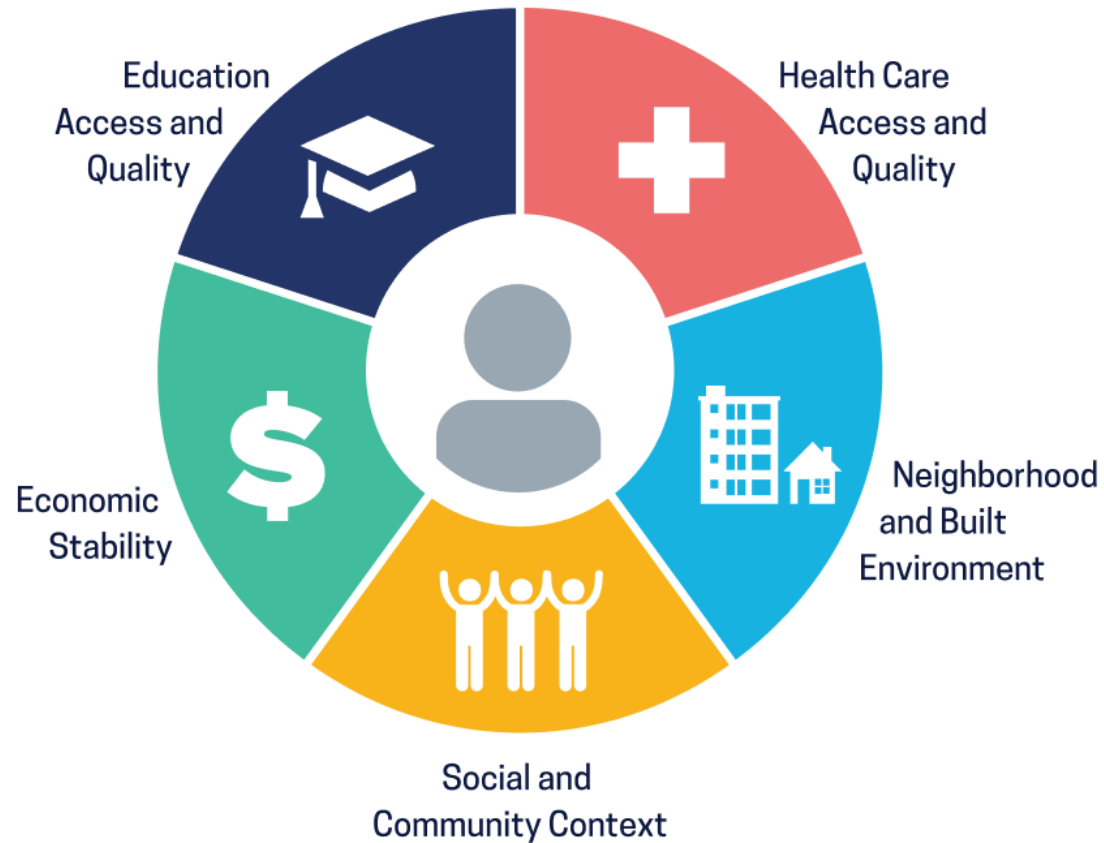

# Social Determinants of Health

*“Social determinants of health (SDOH) are the nonmedical factors that influence health outcomes. They are the conditions in which people are born, grow, work, live, and age, and the wider set of forces and systems shaping the conditions of daily life.”*

The conditions in the environments where people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks.

# Data Walks

# What is a data walk?

INTERACTIVE DATA SHARING EXPERIENCE BETWEEN COMMUNITY LEADERS, OR IN THIS CASE STUDENTS, AND DATA EXPERTS

EXPERIENCE PROVIDES TOOLS TO EMPOWER AUDIENCE TO MAKE DATA-DRIVEN DECISIONS FOR THE BETTERMENT OF THE PUBLIC'S HEALTH

THE DATA WALK DIVIDES THE AUDIENCE INTO SMALL GROUPS WHERE THEY ROTATE AROUND DATA STATIONS, SPENDING TIME WITH THE DATA EXPERT

AFTER A FACILITATED DISCUSSION, THE AUDIENCE VOTES ON WHAT SHOULD BE THE LEADING HEALTH PRIORITY AREAS FOR THE NEXT 3-5 YEARS

# Who Attends a Data Walk?
